Next Generation Vaporizers

About us

Liquigas Power Private Limited, having its manufacturing unit in Pune and headquarter in Mumbai. Company known to be One of the best LPG vaporizer manufacturers in India, has recently crossed a noteworthy feat - to have delivered 450+ industrial applications and installed 2000+ LPG Industrial burners in various solutions across the country. In addition to this achievement, Liquigas also becomes one of its kinds company to be recognized for its highly sophisticated heaterless vaporizers range.

Liquigas products have been engineered by most respected designers from IIT Mumbai and leaders in Gas Engineering Company having experience of more than 16 years in the field of LPG and Thermal Engineering.

We are also developing many new products in this segment which will bring revolutionary change in this field. We are market leaders due to our strong engineering and design background and shall remain on top with our renewed focus on Research & Development.

MISSION & VISION:

Committed to Deliver Innovative Energy Solutions, to become globally respected company in the field of Gas Engineering

VALUES :

"We have culture that has all the ingredients for building profit on a foundation of values rather than being just set of figures." We strongly believe this and proud of it.

QUALITY POLICY :

Our Quality Policy start and ends with the customer as a focal point: understanding the customer's requirements with correct application Engineering, designing optimal solutions to meet those requirements, building systems and processes in place to ensure quality at every stage, and achieving our commitments on delivery and service before and after sales. It is our endeavor to create a culture of total quality where continuous improvement of our people, our processes and our products becomes a way of life.

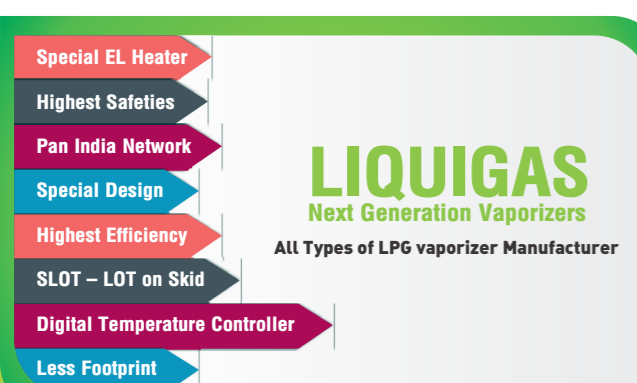

We specialize in the manufacturing LPG Vaporisers of various types and capacities according to the need of the customer. The LPG vaporizer is a cost efficient way of improving the LPG heating system. By installing a LPG vaporizer you reduce the running cost as well as save up immensely on gas expense.

The Next Generation Vaporizers

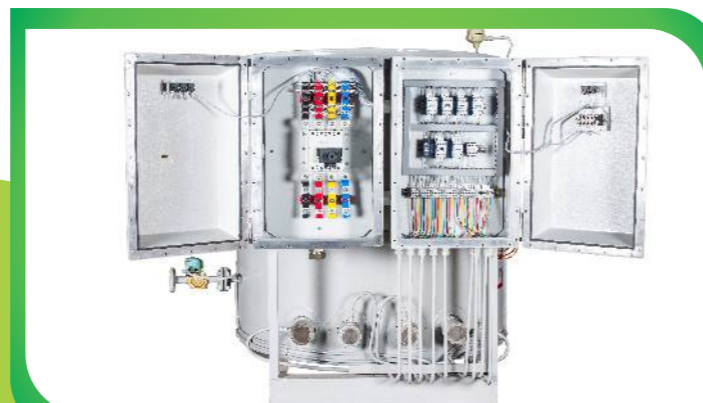

- Electrically heated hot water bath type
- Heater less Vaporizers - Eco Friendly Series.
- Dry type electrically heated vaporizers
- Hot water/ steam based vaporizers- Waste Heat Recovery Series.
- Solar based vaporizers / Air Heated Vaporizers- Non Conventional Energy Series.

The Liquigas Vaporizer's are best in class with the following features:

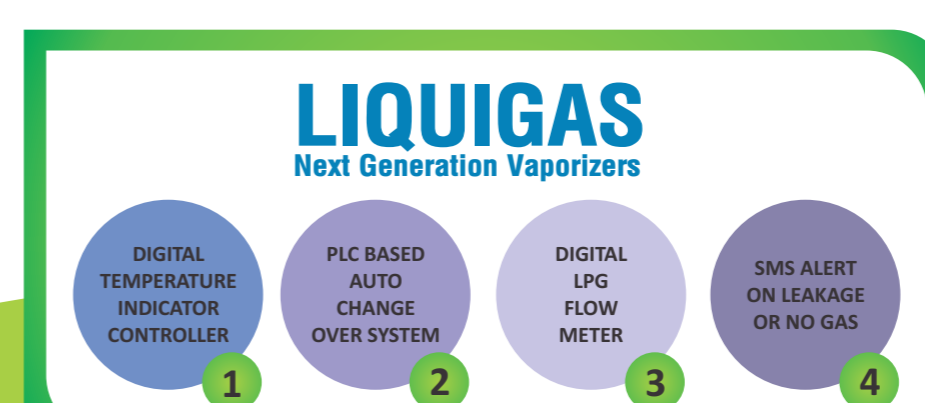

- Most compact design - requires less footprint.
- Less initial heating time.
- Complete Digital Temperature Control system.
- Specially designed electric heaters.
- Specially designed Contaminant Separator for heavy hydro carbon removal and liquid drain (Can be available in Auto mode also)
- Outer shell made up of most trusted material (TATA / Jindal) Most safe design
